WEST BROMWICH
DEPOT SPECIAL

UPDATE LAYHER

LAYHER'S NEW DEPOT IN THE HEART OF ENGLAND OPENS ITS DOORS

Bringing the full range
of Layher products and
expertise directly to the
Midlands and Wales

Steve Pickard
Operations Manager

The new Layher depot at West Bromwich, near Birmingham, puts Layher's equipment and expertise right in the centre of England for the first time with the opening of a storage and demonstration facility.

The site's location adjacent to the M5 enables unprecedented access via the region's motorway network including M6 and M54 motorways to the north and west, and M6 and M42 routes to the east.

"This means not only being able to demonstrate our equipment but also to transport it more quickly to customers within the region, often accommodating short demand requirements," says Sean Pike, Layher's UK MD.

Experienced in working with Layher equipment for many years, Steve Pickard, Operations Manager, and his colleague, Andy Gee, Area Sales Manager, are well versed in its design characteristics and the

solutions that it enables. Under the management of Steve and his team, the doors at West Bromwich are now open for business!

"We are investing to bring our services closer to our customers by extending Layher's UK network, building upon the successes of Letchworth in the south, Eggborough and Livingston in the north of England and Scotland, and throughout Ireland".

More Possibilities. The Scaffolding System.

ALSO AVAILABLE AT WEST BROMWICH –
THE **NEW ALLROUND LIGHTWEIGHT SYSTEM**

THE LAYHER CHOICE

✓ ALLROUND LIGHTWEIGHT SCAFFOLDING

Maximised installation versatility centred on Layher's acclaimed 'rosette' design.

✓ EVENT SYSTEM

Dedicated equipment designed to be expandable and adaptable – meeting a vast number of concert and sporting event staging, stand and platform requirements.

✓ PROTECTIVE SYSTEMS

From 'Protect' containment panels to a choice of temporary roofing systems – all designed to help maximise efficiency and improve the building environment.

✓ SPEEDYSCAF®

Simple, manual erection using just five basic components to create a strong, stable access system.

✓ FALSEWORK (TG60)

With a few additional components, Allround® can easily be converted into a falsework system offering back-propping, crash-deck and load support solutions.

✓ ROLLING TOWERS

Fast to erect, easy to reposition, safe and with a choice of decking sizes – the optimum answer to mobile access.

✓ LADDERS AND STAIPTOWERS

Direct stairtower connection to scaffold design provides safe, durable access for multiple personnel use at any height – together with a choice of ladder designs that all offer durability, stiffness, safety and stability.

✓ ACCESSORIES

From steel or aluminium unit beams, scaffold tubes, couplers and castors to hoists, nets, wall anchors and hardware, the choice of optional accessories from Layher is innovative and extensive – to maximise the success and effectiveness of every installation.
